Location :
Inhouse training
Massy (France)
Remote training

Objective

- To master the "administrator" features of the software, in order to manage user access to the Primavera solution.

Learning outcomes

- At the end of this Primavera P6 Administrator training, each participant will be able to administer a Primavera database and configure access.

Public

- This Primavera P6 Administrator course is intended for project managers and anyone involved in an enterprise project.

Prerequisite

- It is preferable to know the fundamentals of project management. The validation of the prerequisites will take the form of a preliminary interview (by phone or email) or the submission of a certificate or equivalent diploma.

Training materials

- Syllabus + case studies each trainee will work on a PC with Primavera

- The software P6 is provided during the training course for case studies and exercises

Our instructors

- Our trainings are given by international experts recognized for their skills and expertise in risk analysis and complex project management
